Capstone Design Courses, Part II
Preparing Biomedical Engineers for the Real World
# Contents for Part II

## Introduction

1. Introduction ...................................................................................................................... 1

## PART I  Goals of Capstone Design Courses

1. The Myth of the “Industry-Ready” Engineer ......................................................... 5
2. Recent Trends and the Current State of Capstone Design ..................................... 7

## PART II  Preparing Students for Capstone Design

3. Preparing Students for Capstone Design ................................................................. 13
4. Helping Students Recognize the Value of Capstone Design Courses .................. 15
5. Developing Teamwork Skills ...................................................................................... 19

## PART III  Incorporating Real-World Constraints into Capstone Design

6. Incorporating Design Controls .................................................................................. 25
7. Learning to Identify Problems, Unmet Needs, and New Product Opportunities .... 29
8. Design Verification and Validation ............................................................................. 33
9. Liability Issues with Assistive Technology Projects ................................................. 37
10. Standards in Capstone Design Courses and the Engineering Curriculum ............ 41
PART IV Enhancing Capstone Design ............................ 49
12 Learning from other Engineering Disciplines: Capstone Design Conferences . . . . 51
13 Maintaining a Relevant, Up-to-Date Capstone Design Course .......................... 55
14 Active Learning in Capstone Design Courses ........................................... 59
15 Showcasing Student Projects: National Student Design Competitions ............. 63

PART V Preparing Students for the “Real World” .............. 69
16 Managing Student Expectations of the “Real World” ......................... 71
17 Career Management and Professional Development ............................. 75
18 Conclusion ......................................................................................... 79

Author’s Biography ................................................................. 81
