From research question to preservation

- Planning for a digital scholarly project
- 2. Seeking support for your work
- 3. Publishing
- 4. Evaluating digital scholarship
- 5. Framing digital scholarship within the context of career trajectory
- 6. Preservation

Planning a Digital Scholarly Project

- 1. What is the state of the research materials you plan to work with?
- 2. What are the key questions you want to ask of this material?
- 3. Do your questions and materials lend themselves to digital research method, or digital modes of presentation, or both?
- 4. What is the scale of your work?
- 5. What are some similar types of projects after which you can model your work?
- 6. What local resources and supports are available for you to draw upon?
