CERTIFIED EXERCISE EXPERTS FOR AGING ADULTS CONGRATULATIONS GRADUATES!

Danille Parker, PT, DPT, GCS, CEEAA

The SOG Certified Experts for Aging Adults (CEEAA) program, co-chaired by Marilyn Moffat, PT, DPT, PhD, GCS, CSCS, CEEAA, FAPTA, and Karen Kemmis, PT, DPT, MS, GCS, CDE, CPRP, CEEAA, continues to be a huge success. Since 2009, over 600 therapists have successfully completed the 3-course series, including the written and practical examinations to proudly use CEEAA after their name. The SOG would like to congratulate the following individuals who have completed the series in 2012 and early 2013.

Therapists with the CEEAA credential demonstrate expert clinical decision-making skills in: examining the aging adult in multiple areas; designing and applying efficient and effective exercise prescriptions; and using the best evidence for exercise interventions for all aging adults. Some of the top reasons, as stated by graduates, to obtain your CEEAA certification are to:

- Learn, practice, and use tests and measures with strong psychometric properties that scientifically measure outcomes in the areas of aerobic capacity, anthropometric characteristics, attention and cognition, gait and locomotion, balance, motor function, muscle performance, posture, range of motion, sensory integrity, and vestibular function.
- Expand your understanding of, frequency, intensity, time, and type for exercise prescription based on science so that you know how to challenge your patients/clients to preclude them from sliding down the slippery slope of aging.
- Learn how to determine appropriate and safe intensity for all categories of exercise for your patients/clients regardless of diagnosis and practice setting.
- Practice and learn how to teach hundreds of different aerobic conditioning/endurance, balance, body mechanics and postural stabilization, flexibility, gait and locomotion, and muscle performance training exercises that can be modified for any aging adult.
- Have the latest evidence for how and why exercise helps with many conditions, including: cancer, cardiovascular, endocrine, musculoskeletal, neuromuscular, cognitive, obesity, pulmonary, and renal diseases, disorders, and conditions.
- Have the knowledge and the assurance that physical therapists are the professionals who are the key in improving the health and fitness of our aging population.

Still considering taking the CEEAA course series? See what your PT peers are saying about the CEEAA courses to help you decide:

- "This is by far the most beneficial course series of my professional career. Everything is applicable and relevant and so clinically oriented. I was able to return to the clinic and apply the information immediately."
- "Best Con-Ed course series I have taken. Very excited to be part of this profession again."
- "This has been the best course. There is so much useful information. I wish every PT who works with the elderly could take this course. We would change many lives."
- "The comprehensive and exhaustive attention to evidence is incredible. The overall seriousness and enthusiasm of the team lends an air of urgency to the call for PTs to "GET WITH IT" in evaluating practice standards in our geriatric population."
- "If this certification course hasn't increased my practice standards, nothing will."

The process to attain the CEEAA is to complete formal didactic education, and to participate in supervised and mentored skills development, home-based reflection, and critical thinking. Three courses of two days address 3 different and increasingly complex aspects of exercise design and delivery. The 3 courses are designed to build on each other; however, Courses 1 and 2 can be taken out of sequence. If you have taken part of the series but not completed, please contact the Section office at 866-586-8247 for information on how to complete your certification.

We have had ***sold out*** crowds, so don't wait to sign up! We look forward to seeing you at any of the 2013 or 2014 scheduled series!

If your site is interested in hosting this series, please contact Danille Parker, chair of the Regional Course Committee at Danille.parker@marquette.edu or 414-288-3179.
